

BioAquatic Explorations on Grand Bahama Island

We invite you to Grand Bahama Island to broaden your knowledge and application of CranioSacral Therapy through learning techniques for Aquatic CST, and experiencing multi-therapist sessions in the water and with dolphins. The tropical Bahamian environment provides a dynamic and supportive environment for the exploration and unfolding of our healing processes, as well as our relationships with ourselves, our fellow humans, and our environment. Join us in exploring our BioAquatic Explorations with aquatic CST and multi-species interactions, as we embrace and accept the uniqueness of each individual in the ocean and with dolphins!

BioAquatic Explorations: SomatoEmotional Release (BAES)

Prerequisite: SER1

June 30 - July 3, 2024 - Freeport

For UII therapists who have completed a minimum of SER1. Dolphin Swim Incorporation of CST and SER in ocean sessions and Dolphin Assisted Therapy.
